

View of the macular pigment and respective areas where the three carotenoids accumulate

The three antioxidants known as carotenoids — Lutein, Meso-Zeaxanthin, and Zeaxanthin — formulated in a 10:10:2 ratio is shown to increase macular pigment optical density.

Several studies show a 10:10:2 Triple Carotenoid Formula significantly increases macular pigment optical density. Research shows a 10:10:2 ratio can:

- 1 REDUCE GLARE**
Improved tolerance of bright lights
- 2 BOOST CONTRAST SENSITIVITY**
An increased ability to perceive fine details
- 3 IMPROVE PHOTOSTRESS RECOVERY**
Faster recovery time from bright lights such as harsh field lights

SUPPLEMENT FACTS

Serving Size: 1 Softgel, Servings Per Container: 90

Amount Per Serving	% Daily Value	
Calories	5	
Total Fat	.5 g	1%**
Lutein	10 mg	†
Meso-Zeaxanthin	10 mg	†
Zeaxanthin	2 mg	†
Omega-3 Fish Oil		
EPA (Eicosapentaenoic Acid)	50 mg	†
DHA (Docosahexaenoic Acid)	250 mg	†

** Percent Daily Values are based on a 2,000 calorie diet.

† Daily Value not established.

Other Ingredients: Fish Oil, Gelatin, Glycerin, Purified Water, Yellow Beeswax, Soy Lecithin, Lemon Flavor, Annatto, Tween 80, Ascorbyl Palmitate and Natural Mixed Tocopherols. **Contains Soy.**

VISION EDGE PRO

www.macuhealth.com

SUPPORT YOUR VISION

The average person consumes only one to two milligrams of macular carotenoids daily.** With its 22 mg of macular carotenoids, research has shown the 10:10:2 ratio of carotenoids increases macular pigment density, which supports eye health and visual function.

DOCTOR RECOMMENDED

Numerous clinical trials have demonstrated significant benefits from regular supplementation with the ingredients found in Vision Edge PRO. The 10:10:2 Triple Carotenoid Formula has been shown to accumulate in the retina increasing the macular pigment density, which can improve contrast sensitivity, vision in glare and vision in low light.

SUPPLEMENT CERTIFIED

The independent firm Supplement Certified*, a global leader in food supplement testing, examines every batch of Vision Edge PRO to ensure it is safe and stable, meaning that:

- ✓ Each bottle contains the levels of nutrients shown on the label.
- ✓ Our active ingredients will not degrade over the entire shelf life.

SUPPLEMENT CERTIFIED

THE BENEFITS OF HIGH MACULAR PIGMENT:

1 ANTIOXIDANT / ANTI-INFLAMMATORY

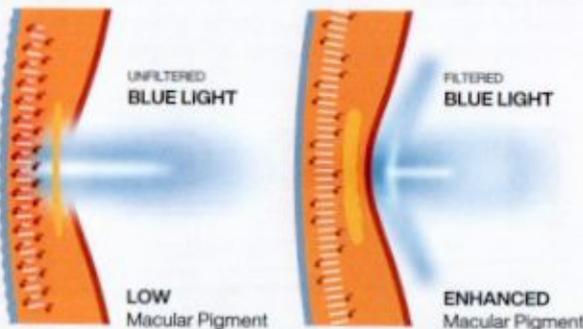

Minimizes the presence of free radicals and reduces inflammation within the retina.

2 IMPROVED VISUAL FUNCTION

Studies show improvement in contrast sensitivity, vision in glare and vision in low light conditions.

3 BLUE LIGHT ABSORPTION

Harmful high-energy blue light from sunlight and digital devices is absorbed by macular pigment.

THEY SAY LIFE IS A GAME OF INCHES...

But it actually comes down to milliseconds. If you can react faster, you'll perform better — whether you're a professional athlete or someone who simply wants to drive safer.

Increased screen time and the blue light exposure that comes with it can generate increased free radicals and inflammation in the retina, compromise visual comfort, and diminish visual functions.

DHA and EPA omega-3 fish oil has been shown to work synergistically with the macular carotenoids Lutein, Meso-Zeaxanthin and Zeaxanthin.¹ 300 mg of DHA+EPA is recognized by most health organizations as meeting the minimum daily requirement for omega-3s.
